The same methodology shall also be adopted to calculate the rate beyond 7000 tonne. Likewise, ceiling rates for performance below 5000 tonnes shall be calculated by reducing the base rate accordingly.

(B). Others:

Average daily crane performance (in Metric Tonne)	Ceiling rate per tonne (in ₹)	
	Foreign	Coastal
2750-3749	105.31	63.18
3750	110.85	66.51
3751-4750	116.39	69.84

Note: To calculate the incremental ceiling rates as shown above, the base rate was enhanced to 105% for first thousand tonnes. The same methodology shall also be adopted to calculate the rate beyond 4750 tonne. Likewise, ceiling rates for performance below 2750 tonnes shall be calculated by reducing the base rate accordingly.

Notes:

(i). The formula for calculation of average berth-day out put is s follows:

$$\frac{\text{Total Quantity loaded / unloaded by the HMC}}{\text{Total time taken from vessel commencement to completion}} \times 24 \text{ hours}$$

(ii). According to the average berth-day out put for the vessel from commencement to completion of loading / discharge of cargo, the appropriate rate of crane hire charge will be chosen for recovery from port users for the full quantity of cargo loaded / discharged.

(iii). If one HMC works with another HMC or ELL cranes, the Berth-day out put for the crane will be ascertained on the basis of the quantity as recorded by the HMC's load meter.

(iv). In case of breakdown of the crane for more than one hour till the vessel leaves the berth, the quantity handled by HMC will be determined taking into account cargo loaded/ discharged prior to break- down divided by crane working hours and multiplied by 24.

(v). In case of stoppages of operation of HMC for more than two hours at a stretch for reasons not attributable to the HMC, appropriate allowance will be allowed to the crane while calculating the total time of crane operation in the vessel. Stoppages of HMC for less than 2 hours will not be taken into consideration for the above purpose. No allowance will be allowed for stoppages attributable to the HMC. All stoppages in loading / unloading operations during working of HMC are required to be certified by the Stevedore of the vessel in the daily vessel performance report.

- (vi). In case shifting of a vessel becomes necessary due to breakdown / non performance of HMC, the shifting charges of the vessel from berth to anchorage will be recovered from the crane operator in addition to a penalty of ₹ 1,00,000/- (Rupees on lakh only). The shifting charges so recovered will be refunded to the vessel's agent while the penalty will be retained by the port.
- (vii). In case of dispute on the average out put the decision of the port trust will be final and binding.
